FIXTURE PARTS

- A. Mirror Frame
- B. Back of Mirror
- C. Picture Frame Hangers
- D. J Hooks & Mounting Hardware (Included)

INSTRUCTIONS

1. Remove the mirror from the packaging and identify all the parts before installation.
2. Select the desired location on the wall (use a stud finder to check for studs) to hang the mirror.
3. Use a level and mark the locations for the J hooks and the mounting hardware holes.
4. Lift the mirror to the marked mounting points to ensure that it is level and to ensure the points align with picture frame hangers. It is best to have a second person assist with this installation.
5. Drill the holes and install the mounting hardware and J hooks.
6. Carefully hang the mirror to align with the J hooks, ensuring they are level before fully releasing it.
