Safety Information

IMPORTANT SAFETY INSTRUCTIONS

This portable lamp has a polarized plug (one blade is wider than the other) as a safety feature to reduce the risk of electric shock. This plug will fit in a polarized outlet only one way. If the plug does not fit fully in the outlet, reverse the plug. If it still does not fit, contact a qualified electrician. Never use with an extension cord unless plug can be fully inserted. Do not attempt to defeat this safety feature.

Turn off electrical current at the source before working with any lighting fixture or portable lamp.

Install and use this product in adherence with local electrical codes and regulations.

INSTRUCTIONS

1. Carefully unbox and examine all the items included in the packaging of the lamp.
2. Screw the stems into the base of the lamp.
3. Attach the portion of the lamp that holds the lamp socket to the stems and use the provided spanner wrench, hex nut and washers to secure it in place.
4. Affix the top cover to the socket assembly with the screws provided.
5. Screw the lamp into the socket (see label for Max wattage information).
6. Assemble the lamp shades together with washers, nut and finial.
7. Place the shades on the fixture and use the screws to secure the shade assembly to the socket assembly.
8. Remove the protective cover from the plug portion of the power cord and plug it in into a functioning electrical outlet.
9. Use the switch to turn the lamp on and off to test that it functions properly.
