

Chandelier Orientation Instructions

A31

Your new chandelier has been designed with a unique feature that allows for orientation adjustment after installation. This is useful for keeping the chandelier aligned with the table, particularly after cleaning.

To Adjust the Orientation

1. Loosen the adjustment screw.
2. While grasping the center column of the chandelier, turn the body of the chandelier in the desired direction. Adjust in small increments and allow the chandelier to settle between adjustments.
3. When the desired orientation has been obtained, tighten the adjustment screw.

If you need further assistance, or find that you are missing any parts, please contact the dealer from which you purchased this product. We hope you enjoy your fixture!
